### Ocean Presence Technologies Unveils the Mini-OceanCam PTZ Camera

Santa Cruz, CA – February 19, 2025 – Ocean Presence Technologies, a leader in underwater video equipment, is excited to announce the development of the all new 4K video OPT-25UHD Mini-OceanCam PTZ camera with AI capabilities.

This new addition to their product line is the smallest and most affordable Pan-Tilt-Zoom (PTZ) camera available on the market, designed to enhance underwater exploration and research.

“At OPT, we are dedicated to advancing underwater research and technology.

Our OceanCam, initially designed for manta ray studies, is now a versatile tool utilized in multiple fields, enhancing both scientific and commercial pursuits,” said Robert Aston, President of Ocean Presence Technologies.

**Applications:** The OPT-25UHD Mini-OceanCam is suitable for a wide range of applications, including underwater imaging, ocean conservation, educational outreach, live streaming, remote sensing, underwater surveillance, and as submersible cameras on ROVs (Remotely Operated Vehicles).

## **OPT-25UHD Key Features:**

- Ultra-High-Definition Video: Captures stunning 1080p HDTV at up to 50/60 frames per second or 4K video at 30 fps, ensuring crystal-clear footage of fast-moving subjects with minimal noise and motion blur.
- Compact Design: Standing just nine inches high with a five-inch diameter, the OPT-25UHD is perfect for discrete placements in small aquariums, pools, or tanks.
- AI Image Tracking: Advanced technology for precise subject tracking, making it ideal for marine biology, environmental monitoring, and underwater research.
- Seamless Integration: Compatible with existing audiovisual setups, including NewTek's NDI, allowing for easy integration into current systems.
- Remote Control: Manage multiple cameras effortlessly via LAN connections, providing flexibility and ease of use.

**Availability:** Advanced orders for the OPT-25UHD Mini-OceanCam are now open. Be among the first to enhance your underwater exploration with this cutting-edge addition to Ocean Presence's extensive product lineup.

## **About Ocean Presence Technologies**

With over 20 years of experience, Ocean Presence is dedicated to providing innovative solutions for underwater imaging and research. OPT designs and manufactures a full line of high and standard definition underwater IP video products including cameras, underwater lighting and wireless network components. The OceanCam cameras are employed in research, education, security and other commercial oceanographic applications. Its products are sold through international distributors and through its direct sales staff in its Santa Cruz California facility.
